

Spring 2006 Math Supplemental Instruction Schedule

The purpose of these classes is to give the students another avenue to get help with their math classes. Some classes are offered more than one time, and the same material will be reviewed at each meeting time. The time will be spent reviewing the subjects from the previous week, answering homework questions, and helping the students make a connection with the math that they are learning. For more information, contact Alisha McCann, mccann@suu.edu.
